

# DIE COLLARS (DC)

Technical Data Sheet

## General :

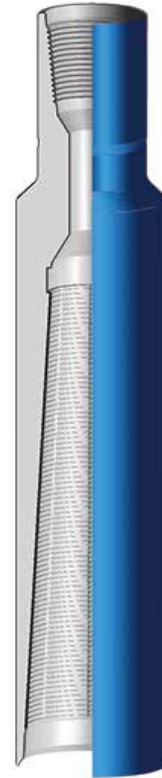

Die Collar is a special external fishing tools which is tapping on the outside wall of fish. The die collar is designed for high strength alloy with a cutting groove in the fishing threads. Die collar are used to tap threads into the tubular steel of fish so that it can be retrieved.

## Applications :

Die collar is able to apply for fishing tubulars, bridge plugs, packer and other downhole equipment when the conventional releasing overshots or spear cannot be used.

## Features and Benefits :

1. Monoblock design for higher strength point purpose.
2. V-Type wickers for easier tapping onto the tubular fishing
3. Sloping lower-end guide for insuring proper engagement even with uncentered fish in the hole.
4. Various sizes and connection available to catch of any size or type of fish properly.
5. Available with Right (R) or Left (L) hand wickers for standard operating or backing off the fish.
